

AMENDMENTS TO THE CLAIMS

This listing of claims replaces all prior versions, and listings, of claims in the application.

1. (Currently Amended) A downloading service system for managing downloading services provided in a hotel in which a casino is located, comprising:
 - house card issuing means for issuing a house card which stores user information enabling identification of a user of the downloading services;
 - an intra-service server for transmitting casino data required for a casino game in response to a download request including the user information;
 - casino data reception means for receiving the casino data from said intra-service server; and
 - a service management server comprising means for managing a casino deposit which enables the user to utilize the casino services upon acquisition of the house card, with the casino data received by said casino data reception means, and for restricting use of the casino services by the user using the casino data based on usage restriction conditions placed on the casino deposit, wherein
 - the house card is a guest room key for a user lodging in the hotel, and
 - the usage restriction conditions restrict the use of the casino services when the casino deposit accumulated over a time period has exceeded an upper limit.

Claims 2 and 3 (Cancelled).

4. (Previously Presented) The downloading service system according to claim 1, wherein said intra-service server comprises means for updating the casino data in response to an update request.

5. (Previously Presented) The downloading service system according to claim 1, comprising:

a multi-media server for transmitting content data to said casino data reception means in response to the download request; and

a house card server for storing service data indicating use of the downloading services for downloading the content data.

6. (Previously Presented) The downloading service system according to claim 5, wherein said multi-media server comprises means for updating the content data in response to an update request.

7. (Previously Presented) The downloading service system according to claim 1, comprising an action history management server for managing actions of the user by obtaining the user information.

8. (Previously Presented) The downloading service system according to claim 1, wherein the service management server restricts use of the casino services by the user using the casino data when the casino deposit reaches zero.

Claim 9 (Cancelled).
